We **Ningbo Greetmed Medical Instruments Co.,Ltd** is a professional manufacturer and one of the biggest medical products suppliers in China. We located in Ningbo nearby Shanghai which is the only deep-sea port city of China.

Our leading products are the disposable medical tubing including the oxygen mask/nebulizer /foley catheter/silicon catheter/ urine bag as we have very good plants with high technics and professional staff and strict management system.

In 2009, we had a golden partner factory that is special to make the surgical dressing and cotton dressing products ,first aid dressing on very nice quality as per UK B.P standard.

In 2010 we had new factory in Wuhan near the Yangtse River , special to make the surgical gown, isolation gown, non woven face mask, CPE thumb gown, bed sheet.

To meet our end users' requirements, we expanded our business line to the sterilization pouch, the condom,glove,suture and so on. But all our cooperation factories must have advanced production equipment and facilities and quality control system. As our aim is to became the most trustworthy medical supplier in the world.

Our company gained the Imp&Exp licence in 2006 and also all our products have been approved by the ISO13485 and obtained CE certificates.Now we have accumulated a large number of customer sources in Europe , South America, Africa, Middle east, the south east of Asia, Australia...

Greetmed is winning better and better reputation in the world.

So please don' t hesitate to contact us, it will be our great pleasure to provide you the most cost effective products upon reliable quality, and all staff in **GREETMED** will do our best to work for you.

Best regards to all clients!

Best greeting to all patients in the world!

May every corner of the world be filled with love!

Families across the globe in good health!

GT024-700 Endobronchial Blocker Tube

Endobronchial blocker tube is a device which can be inserted down a tracheal tube after tracheal intubation so as to block off the right or left main bronchus of the lungs in order to be able to achieve a controlled one-sided ventilation of the lungs in thoracic surgery. The lung tissue distal to the obstruction will collapse, thus allowing the surgeon's view and access to relevant structures within the thoracic cavity. Our blocker tubes are making attempts to achieve the one-sided lung ventilation as an alternative to Double-lumen tubes (DLT) and serve as a choice for pediatric patients as well.
Size: Standard PU Cuff Type Size (mm) : 5FR, 7FR, 9FR
Packing: Blister Bag

GT174-100 Ice Bandage

Ice wrap is a cold bandage which uses a revolutionarily new technique for treating injuries, muscle pain and strains.

This bandage reduces recovery time from injuries by combing both the cooling and compressing process in an easy-to-use way.

A specially formulated solution is infused into the elastic bandage that begins to evaporate upon contacting skin, thereby causes cooling of the applied area. Icewrap reduces swelling and provides sufficient cooling to make it a very effective treatment.

Usage:

Find the liquid bag in the ice bag and make it broken and 3 seconds later it will be frozen. Then shake the bag up and down to make the content fully mixed, and the temperature will be depressed below zero by the ice bag in 2 minutes.

Purpose:

To control and alleviate the sore and pain caused by strain, bruise, pull and burn, also can rapidly remove the pain and discomfort induced by fever, headache, toothache, mosquito bite.
 Freeze and keep fresh vegetable, fruit, beer, beverage and food and so on when no cold source available.

Precaution:

The ice bag can only be used for external medication. If eye or skin should contact the content, it must be washed by clean water thoroughly. If one eats the content by mistake, he must drink enough water, try his best to vomit it and turn to doctor when necessary.

In order to avoid a too low temperature, it should be better to wrap the ice bag with a towel or cotton cloth to begin with. Those who have something wrong with their circulation system should refer to doctor in advance.

Characteristic:

This product can refrigerate instantly without cold source and be easily used because of portability.
